SECTION 1.—POPULATION AND VITAL STATISTICS.

NOTE.—*Estimated Population of States.*—For dates subsequent to the latest population Census the estimated population in each State represents the population ascertained at the Census plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions were substantial after the Censuses of 1954 and 1961. The figures for periods between the 1954 and 1961 Censuses have been revised in accordance with the preliminary results of the 1961 Census. They will be further revised when the final results become available.

COMMONWEALTH SALES TAX—SALES OF GOODS AND TAX PAYABLE.

NOTE.—An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustments to be made to the crude figures on this account.

Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payments to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of interest on State debts, special grants, uniform taxation, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated. (c) Includes payments to State trust funds. (d) Excludes interest, etc., charges. (e) Includes loss by Transport Commission and working expenses of Metropolitan Transport Commission.

(a) Refers only to disputes involving a stoppage of work of ten man-days or more. (b) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (c) Includes the Northern Territory and the Australian Capital Territory.

NOTE.—Disputes not settled at the end of a year are included as new disputes in the figures for the following year. Disputes not settled at the end of a quarter are not counted in the number of disputes for the following quarter, but additional workers involved and working days and wages lost are included.

(a) Without interstate duplication. The State figures do not add to the Australian total because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID
AND AVERAGE EARNINGS.(a)

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 75 per cent. of the estimated number of civilian wage and salary earners in employment), from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. An index of average weekly earnings, seasonally adjusted, is published in the *Monthly Bulletin of Employment Statistics* and the *Monthly Review of Business Statistics*.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory.

(c) Includes the Northern Territory. (d) Total wages and salaries, etc. divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

INDEXES OF MINIMUM WAGE RATES AND HOURS OF WORK.

NOTE.—The indexes of weighted average minimum weekly and hourly wage rates and standard hours of work shown on this and the following two pages are based, in the main, on the occupation structure existing in 1954.

Each of the occupations included in the indexes is individually weighted. From the wage rates and hours of work for these occupations weighted averages are calculated for each industry and for all groups.

In the following tables the weighted averages so calculated are shown in shillings and pence and also as index numbers with the weighted average for the year 1954 as base (= 100).

A brief explanation of the methods by which the data for the new indexes were obtained and of the system of weighting was given in Statistical Bulletin No. 786—*New Indexes of Minimum Weekly Wage Rates—Adult Males and Adult Females*, 19th February, 1960. This bulletin also contained tables showing, for each industrial group for Australia and for all groups combined for each State, the weighted average minimum weekly rates of wage and index numbers with the weighted average for the year 1954 as base (= 100), as at the end of each quarter from 31st March, 1939 (for adult males) and 31st March, 1951 (for adult females). Information on the components of the total wage rate was contained in Statistical Bulletin No. 902—*Minimum Weekly Wage Rate Index—Components of Total Wage Rate*.

Particulars for each month from January, 1957, and revised figures for 1958 and subsequent years, were published in the Statistical Bulletin *Minimum Weekly Wage Rates, January, 1957 to June, 1961*. Current information is contained in the *Monthly Bulletin of Employment Statistics*.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(Base of each Group : Average of 3 years ended June, 1939 = 100.)

FARM PRODUCTION PRICE INDEXES.

The annual indexes shown in the following table relate to average "prices" of farm products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the indexes therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The indexes for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes shown below are the Revised Series (December, 1952) in which average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.

The preliminary indexes for 1960-61 are based mainly on the recorded or estimated movement in average values for the major farm products. They will be reviewed from time to time as further "price" data become available.

EXPORT PRICE INDEX NUMBERS.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. In general the index numbers show price changes in the predominant market or markets for each commodity, but average prices realized for exports are used for some markets.

RECENT TRENDS.

The group indexes show the great fluctuations and the wide dispersion of prices of export commodities in recent years. Since wool is a predominant export (and comprises 45.63 per cent. of the base aggregate of the index), fluctuations in wool prices obscure the effect of movements in prices of the other components on the "All Groups" Index. For this reason the combined effect of price movements in these other components is shown separately in the column "All Groups excluding Wool".

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production in the case of gold) during the three years 1933-34 to 1935-36. (But see footnote (b) below.)

(a) Silver, copper, tin, zinc, lead. (b) The individual items comprising the "Meats" group have been altered from October, 1961. For October, 1961, and subsequent months the "meats" group index has been varied by the movement in prices of beef, lamb, mutton and canned meats, weighted according to their annual average exports during 1956-57 to 1960-61. Guaranteed minimum prices are used when operative. (c) Sultanas, raisins, currants. (d) Cattle hides, calf skins. (e) Preliminary. (f) Nominal. (g) Actual prices realized not yet known; provisional series are included in "All Groups" index.

NOTE.—The "fixed weights" index numbers above indicate satisfactorily the general trend of export prices, but take no account of the relative quantities actually sold at the prices ruling in particular months. An index with "changing weights", which takes account of this factor, is published in a footnote to the Export Price Index in the *Monthly Review of Business Statistics*.

SECTION XII—STATISTICAL SUMMARY.

STATISTICAL SUMMARY—AUSTRALIA, 1891-92 to 1959-60.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in the September, 1953 issue of the *Quarterly Summary of Australian Statistics*, pages 112 and 113.

(2) The statistics in this summary relate in general to the periods shown in the table headings; where the statistics relate to other periods, this is indicated in footnotes.
